

Why SAP partners choose Rosslyn Analytics

Digital disruption is rapidly changing the way organizations create and deliver business value.

It's no wonder that executives are actively embracing cutting-edge technologies including data analytics and machine learning to gain a competitive advantage.

Business and IT leaders are investing millions in upgrading their companies' decision-making capabilities. It's a huge opportunity for those SAP partners that are able to provide the right expertise, advice and technology.

Why SAP partners choose Rosslyn Analytics

Why SAP Partners Choose Rosslyn Analytics

Every day, Rosslyn Analytics helps SAP professionals at consultancies, professional services firms and global system integrators do amazing things with data for the first time by leveraging cutting-edge data technologies.

How SAP Partners Leverage Data Technologies from Rosslyn Analytics

Extract and migrate data from on premise into the cloud

Improve the quality of data for use in new and existing reporting systems

Monetize your company's IP by bringing to market new solutions

Improve the efficiency of your consultants by accelerating time to insight

Build out must-have data and analytic capabilities without investing in software

Quickly build and test analytic proofs of concept in days, not months

Benefits of partnering with Rosslyn Analytics:

Reduce SAP deployment times from months to weeks

Bring new revenue making services and solutions to market

Increase customer satisfaction and loyalty

Improve employee productivity with automated technologies

Rosslyn Analytics, the SaaS company, has developed its RAPid Cloud Analytics Platform so organizations such as yours has the means to help customers succeed faster. RAPid reduces the complexity, cost and time of creating new business value from existing data and IT investments including SAP projects. We do this by providing you with a platform that features easy-to-use tools required to support the wide ranging data and analytic needs of your clients.

Our collaboration with Rosslyn Analytics allows Genpact to strengthen a strategic area of our portfolio, and provides data-to-insight-as-a-service to help our clients transform their procurement operations.

Shantanu Ghosh

Senior Vice President,
CFA Services and Consulting at Genpact

Why become a Rosslyn Analytics Partner?

In today's challenging business environment, everyone needs a powerful cloud analytics platform. Get a competitive advantage by accessing the most exciting data technologies to come to market in a generation. In doing so, you'll generate more revenue faster from new and existing customers.

The RAPid Cloud Analytics Platform is such a game changer because, as Forrester Research recently wrote in a report, it is the most complete cloud BI platform in the world.

By partnering with Rosslyn Analytics, you have immediate access to one of the UK's most exciting development teams responsible for bringing to market innovative data technologies that will help you and your clients succeed faster with SAP.

Succeed faster with SAP

RAPid Extract Studio is the world's fastest tool for automatically extracting spend data from SAP

RAPid One-Click Spend Analytics is a fully automated analytic solution that will provide detailed spend analysis within minutes of extracting data from SAP

A suite of self-service data preparation and data quality tools you can use to quickly integrate, cleanse and enrich (ICE) data for use in SAP

A ready-to-use multi-tenant cloud analytics platform, with a data warehouse in the cloud and write-back capability, which you can use to host and deploy applications in minutes

Pre-built analytic solutions designed for you to use and sell to sales, marketing, procurement and human resources

How consultancies work with Rosslyn Analytics

A leading professional services firm turned to Rosslyn Analytics for help in migrating data from multiple and diverse ERP systems into a single, newly centralised view on its RAPid Cloud Analytics Platform. With RAPid, the consultancy team was able to quickly extract and integrate the data into a ready to use data warehouse in the cloud. The data was then cleansed and normalised for analysis using tools on the platform. The services firm was able to cut the time to visibility by half, improving the efficiency of delivering insight to its teams of consultants.

A large consultancy was hired by a client to implement Ariba, a powerful eProcurement solution. However, getting data from its client and into Ariba was a slow and costly task especially at a time when the client sought a quick deployment. The consultancy used Rosslyn Analytics' RAPid Platform to extract and integrate the data from disparate sources before preparing the data for transformation. The improved data was then fed into Ariba so the client had trusted insight in which to base decisions.

Sign-up and become a partner today

Rosslyn Analytics' partner program is recognized for its value. You have all the support to grow and succeed with us. You'll receive product, sales and marketing training, and access to pre-qualified leads and opportunities. With a range of partner types (Alliance, OEM, Referral), you will join a partner program that best suits your business needs such as a 20% referral fee when you introduce a client to us.
